

What can you do
to DingZing
technical film?

DingZing

Sealing Air-Mattresses Tight

Provecta™ technical films deliver superior sealing, which is essential for products like air mattresses, inflatable boats, and life vests. Welding Provecta™ film to itself or other materials creates strong, leak-proof seals.

Print on it.

Make your product pop. Print your designs directly onto Dintex® technical films for high-impact visual appeal.

A close-up photograph of a white electronic device, possibly a speaker or a portable audio player. A rectangular panel on the side is covered in a green, diamond-shaped embossed texture. The device has a sleek, modern design with rounded edges and a minimalist aesthetic.

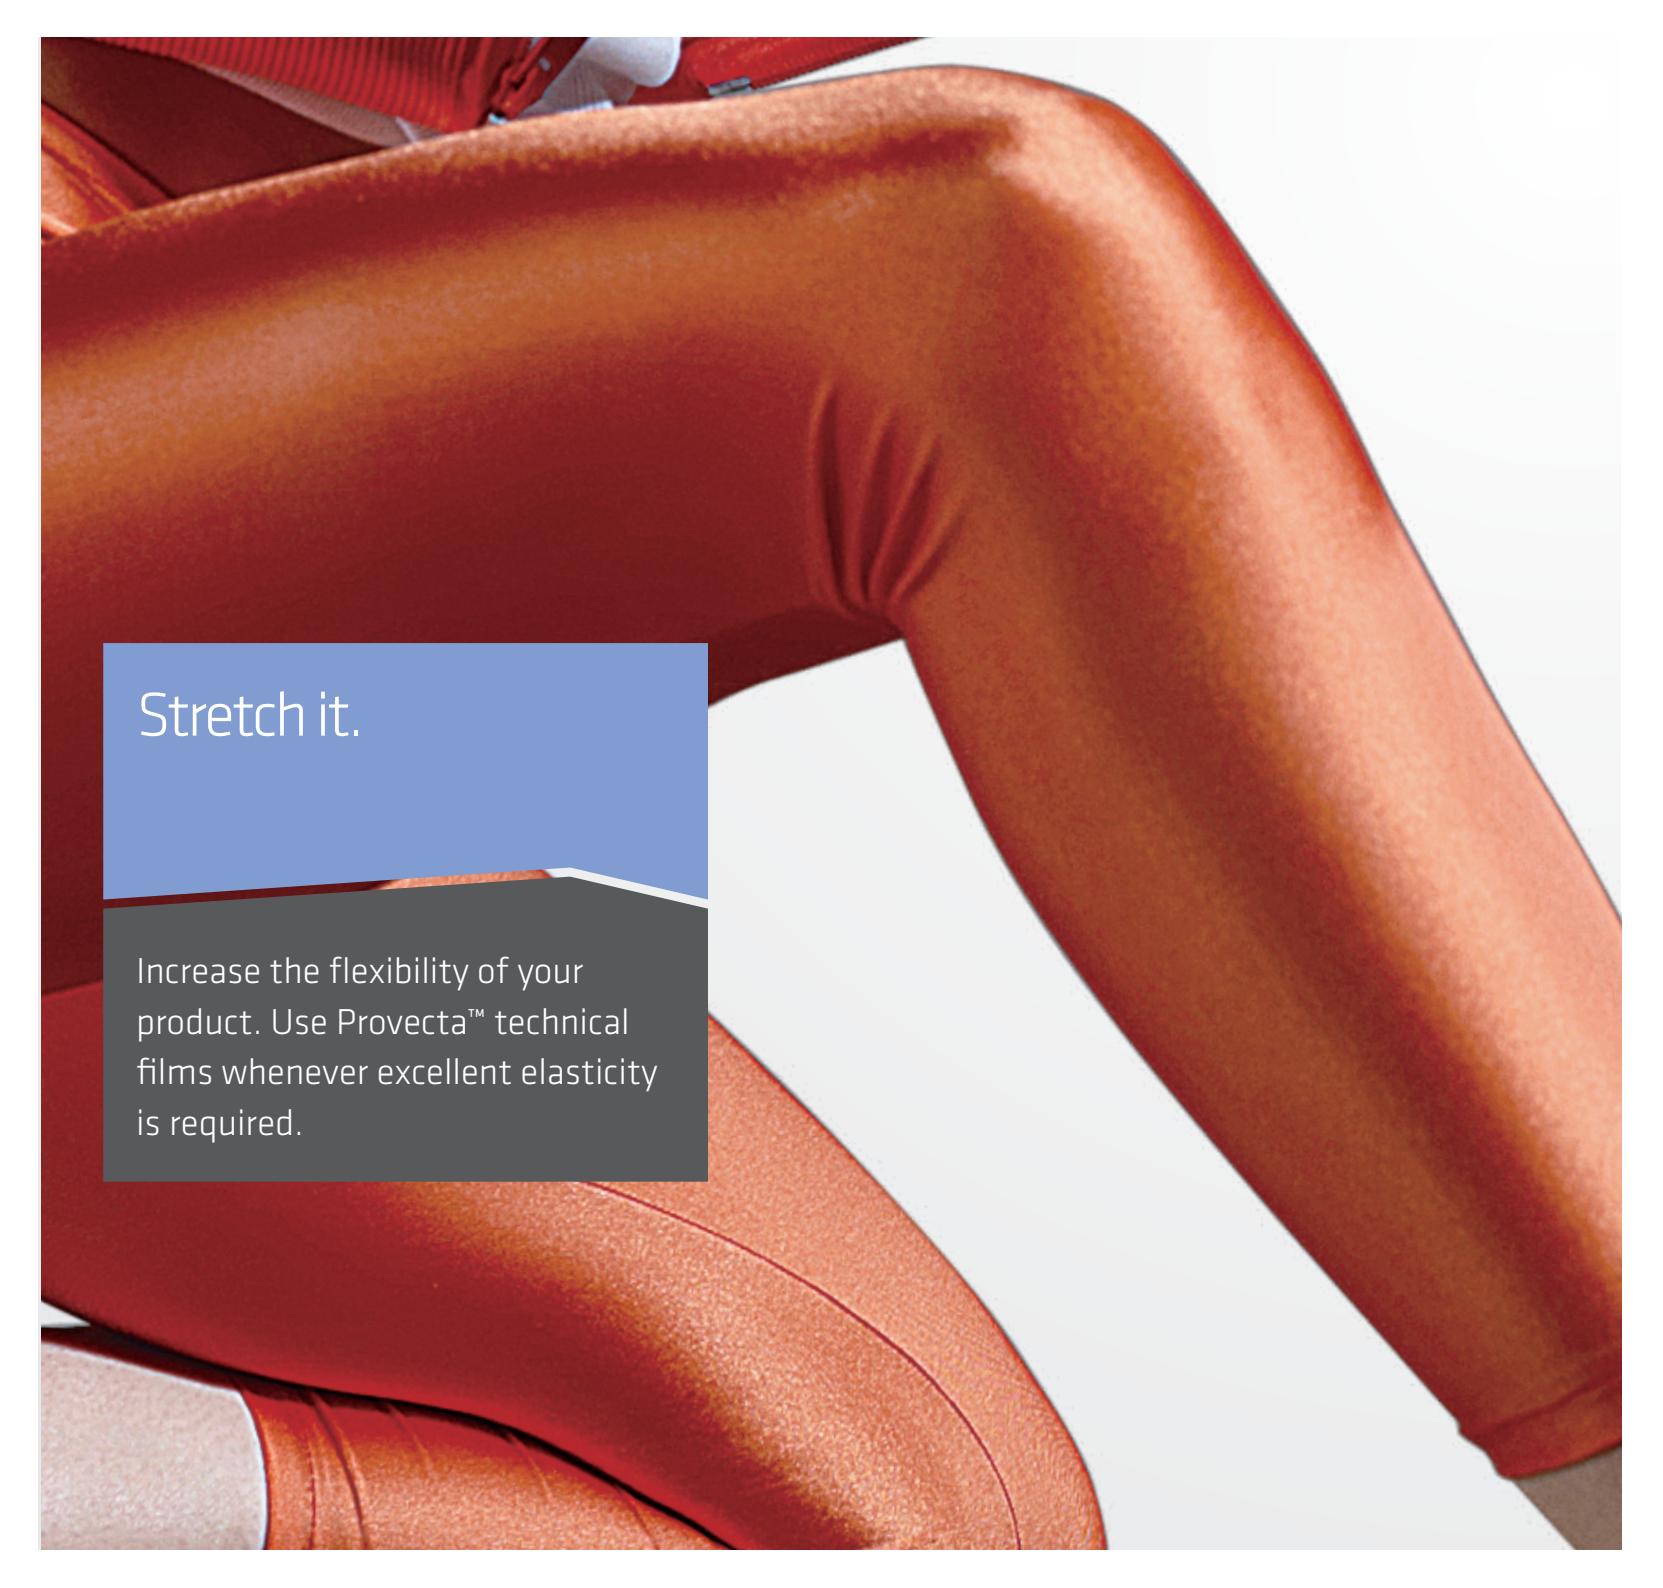

Emboss it.

Give your product that special touch with embossed Orkesta™ technical film.

Mold it.

Style and shape your product's appearance. Thermoform Provecta™ technical film to produce three-dimensional objects and forms.

Stretch it.

Increase the flexibility of your product. Use Provecta™ technical films whenever excellent elasticity is required.

Melt it.

Eliminate stitching in your product by melting Provecta™ technical films to a wide range of substrates and materials.

What else can you do to DingZing technical film?
